

Proven system with improved technology

Starmix sweepers are characterized by a very easy handling and high quality. With the unique disc brush system dirt is not simply pushed in front of the sweeper but directly into the dirt container. The turbo sweeping system with an additional brush picks up dirt twice.

iSweep: Thanks to the new form-fitting construction and the use of new self-lubricating sliding materials the reliability and durability of the driving clutch will be increased significantly. There is no chance for dust, dirt or wetness!

Push handle
ergonomic or with handle bowls.*

Vertical storage
space-saving and clean

Brush down holder and side roller
For easy sweeping along curbs and walls.*

Flexible seals and filter
Dust and dirt are hold back within the machine.*

Brush height adjustment
For disc brushes. Variable and stepless. Ensures optimal clearing performance on various types of surfaces.

Worm gears and tooth sleeves
out of a new self-lubricating sliding glass fibre reinforced plastic. For a longer lifetime.*

Overlaying disc brushes
For a better sweeping performance.

Driving clutch
developed to ensure high reliability.*

Form-fitting construction
External influences, such as dust, dirt or wetness will not affect the function.*

* depends on the device

Haaga Qualität
Made in Germany

The best sweeping performance for professional and private user

Smaller and larger areas in home, garden, on car parks or petrol stations are cleaned tidily as well as large areas in production halls or workshops.

haaga 355
Sweeper for use in home and garden.

haaga 375
For industrial use and larger areas.

haaga 477
For industrial use and larger areas. Side roller on one side.

Special features of the new haaga 355

Telescopic push handle

This push handle allows comfortable working due to three adjustable heights.

Container

Bevelled container for the easy crossing of steps. Easy opening and closing of the container thanks to a new mechanism.

DISC BRUSH SYSTEM / TURBO SWEEPING

All haaga sweepers are available in a new, attractive colour design now!

THE ADVANTAGES AT A GLANCE.

- ✓ Sweeping fine/coarse dirt effortlessly
- ✓ Sweeping wet and/or dry
- ✓ Better sweeping performance due to overlaying disc brushes on both sides
- ✓ Easy to push and long durability because of beltless drive
- ✓ Additional side rollers for easy sweeping along curbs and walls
- ✓ Optimal cleaning performance on various types of surfaces due to variable brush height adjustment

Multifunctional role

Prevents the sweeper from being placed on the ground while sweeping uneven surfaces. Facilitates the sweeping process when passing over unevenness.

Turbo sweeping system

The disc brush technology is extended with a fine dirt roller brush behind it. Finest dirt can be picked up. Sweeping twice in one step.

DISC BRUSH SYSTEM / TURBO SWEEPING SYSTEM

haaga Kehrmaschinen

Tested and found to be good!

All our sweepers are subjected to extensive practice tests.
The haaga sweepers are used in private areas as well as in the professional field.
That's what the testers says:

Johann B. about the haaga 497 professional:

„No way to take a broom in the hand when sweeping larger areas. With the haaga 497 it is so easy. Pull out, one time over it and then back in the corner. Clean, quick and you have time for the next task.“

Michael H. about the haaga 355:

„The new one is great. Even in a confined space, it can be used and takes all the dirt with it. And with the additional roller brush it is all clean in one sweeping step. The device is so light that it can be transported between the floors without any problems.“
