Description

The Puzzi 30/4 is the modern answer to textile cleaning problems. Specifically designed for large textile areas, it represents a user-friendly and economic cleaning solution. The product concept is specially designed to ensure an ergonomic, effortless and timesaving operation.

Features & Benefits

User-friendly EASY-Operation operating concept

Removable dirty water tank

The dirty water tank is easy to remove and can also be used to fill the fresh water tank.

To protect against dirt, the dirty water tank's handle is attached to the outside.

A short description on the rear of the dirty water tank explains the work process simply and clearly.

Extremely quiet

At just 66 dB(A), the Puzzi 30/4 is the quietest wet vacuum cleaner of its kind.

Thanks to the low noise volume, the machine can be used everywhere, even during business hours and in hotels.

The low noise emissions protect the operator and allow longer work intervals.

For large areas

Large transport wheels

Large tank volume

Even with a full 30-litre fresh water tank, the Puzzi 30/4 can be easily transported lying on its back.

The fresh water filter protects the components and can be removed without tools and cleaned.

An integrated level indicator display shows the operator the current fresh water level.

Good suction

High cleaning performance

Height-adjustable handle

Power outlet for PW 30/1

The integrated power outlet enables flexible use of the PW 30/1 without an additional power source.

The PW 30/1 increases the area performance, cleans the pile with a rotating brush and aligns it in one direction.

When not in use, the power outlet is effectively protected by an automatically closing flap.
