

# TwinTec Battery *Setting the Standard*

With these machines every part is designed to combine the best in functionality and reliability.

The TGB4045 is the classic Numatic TwinTec 24V battery model. It started its life with 30 litre capacity, now raised to 40 litre, and is today the most popular model worldwide. The premium specification starts with a steel chassis, structofoam tilting brush deck, polyform tanks, fully sealed gel batteries, built in battery charger, heavy duty TwinFlo wet pick-up vacuum system and heavy duty geared brush drive.

The 4055 is one size up from the 4045 containing all the advanced TwinTec 24V features but with a 20% increased cleaning path.

The 4055T (traction) offers effortless cleaning due to the powerful traction unit. A traction model is essential where inclines such as wheelchair ramps are present.

Simple controls

- Fully Sealed Gel Batteries**  
 Maintenance free batteries to ensure the highest standard of operational life.
- Twinflo Vacuum Motor**  
 Provides exceptional wet pick-up.
- Structofoam Tilting Brush Deck**  
 Making brush and pad changing quick and easy.
- Easy Operation**  
 Simple on / off trigger control.
- On-board Charging**  
 Convenient and easy, just plug and go.
