

ANV 180s Aircraft Vacuum Cleaner

Included Kit

1.9 metre Vacuum Hose

3 Piece Wand Set

Dry pick up Nozzle

240mm ABS Crevice Tool

60mm Multi Angle Brush

Included Filtration

Tritex Filter

HEPA-FLO Dust Bags

Electrical Parameters

Voltage; 110
Supply; 400 Hz
Plug Type; N/A
Cable Length; 20mtrs
Cable Type; Hi-Visibility
Power; 1100 watts (max)
Decibel Level; 67.1 DBA

Performance Data

Suction; 2200mm
Airflow; 40 litres/sec
Hose Diameter; 32mm
Capacity; 8 litres (dry)

Weights and Dimensions

Weight; 5.6Kg (vacuum)
Weight; 1.37Kg (kit)
Size; 340x340x340mm

Supplied with Standard
Two Year Warranty

Description

The ANV 180s has been developed to cater for the demands created when cleaning 'onboard' varying types of Aircraft, making it ideal for commercial cleaning applications where the 'turnaround' time between each flight is kept to a minimum. The power head itself has many technical features ranging from an efficient 'Thru-Flo' vacuum motor, proven to give outstanding results and reliability each time it is used, through to our new 'HI-VIZ' anti kink mains lead. Filtration is an important aspect with any cleaning application and with this in mind, have incorporated a 'Tritex' primary filter and 'HEPA-FLO' dust bags as standard. With an incredible 8 litre capacity provided, combined with an

overall machine weight of 5.6Kg, we are sure you will agree the power to weight ratio is second to none.

It doesn't end there as each vacuum comes complete with a fully integrated accessory kit and an onboard storage facility for the crevice tool and dusting brush, giving more freedom when in use, making this a truly versatile 'unique' cleaning product indeed.
