

The power to perform

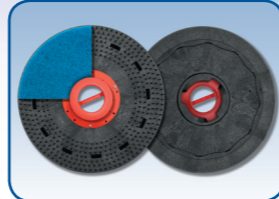

A perfect example of engineering and common sense meeting head on.

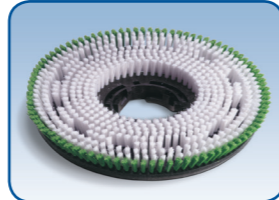

The cable/electric scrubber dryer is the perfect example of innovation, quality and price ... performance you can rely on and floors never cleaner!

Brush and Pad selection

A full range of brush and pad drive systems are available for the TT4045 in order to provide the correct specification for the type of floor to be maintained. All brushes are fully interchangeable and can be varied to suit changing conditions or a change in location.

40cm PadLoc pad drive system

45cm Heavy duty scrubbing brush

45cm Light duty scrubbing brush

45cm Long life heavy duty scrubbing brush

45cm Long life light duty scrubbing brush

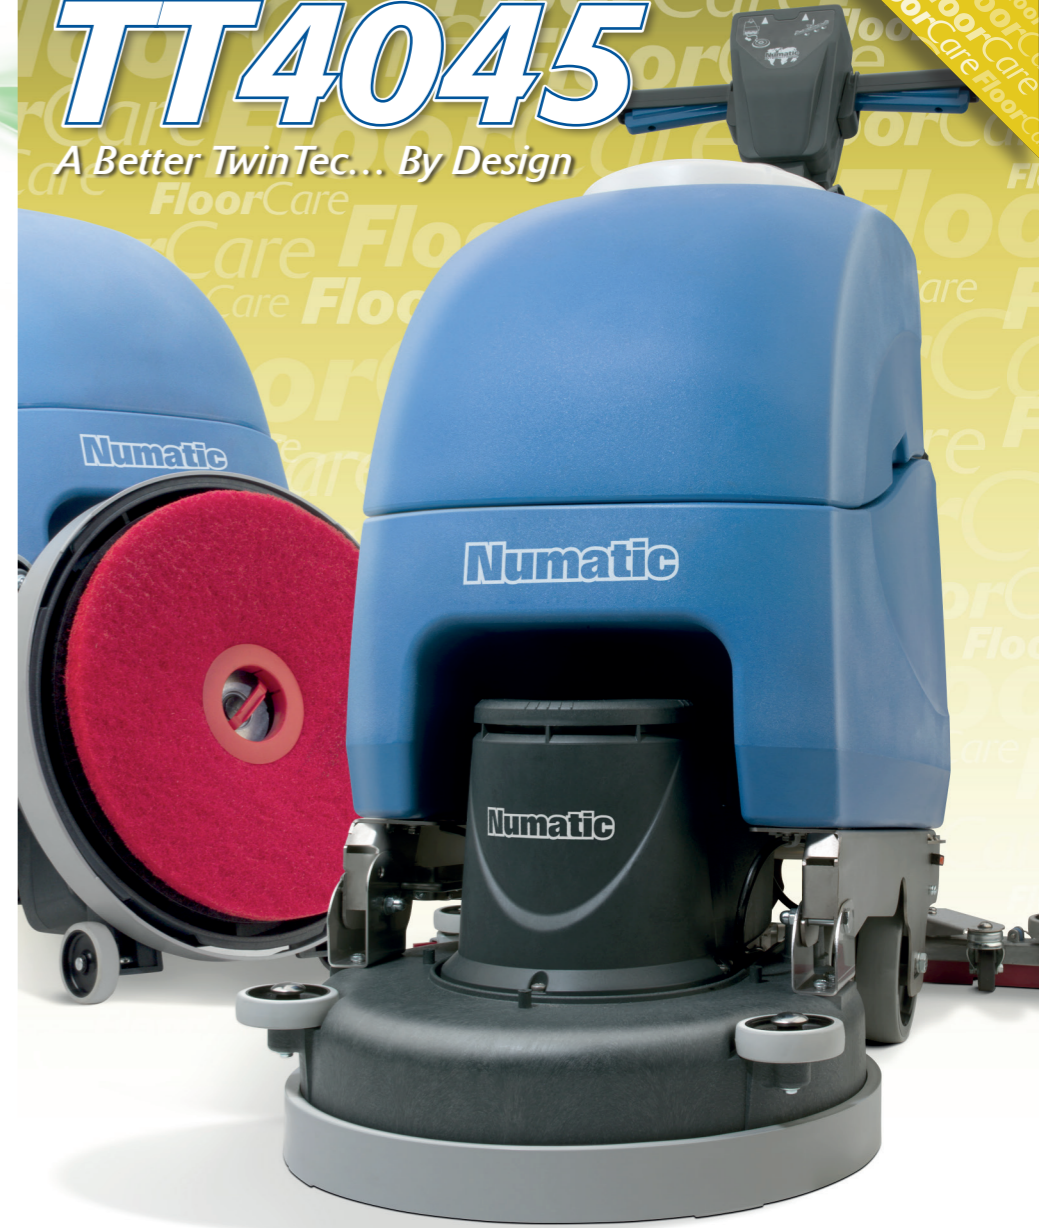

TT4045 Specifications

Model	Brush Motor	Vac Motor	Power	Brush Speed	Range	Pad/Brush width	Capacity	Weight	Dimensions (WxLxH)
TT4045	1500W	1000W	220-240V 50Hz	150rpm	42m	40/45cm	40L	57kg	470x890x1180mm

TT4045

A Better TwinTec... By Design

TwinTec... TT4045

When the floorcare considerations are performance, power, and price... the TT cable machine stands proud.

The outstanding specification of the cable TwinTec machines is, without doubt, to the highest standard both in terms of design and equally in terms of performance.

The big advantage of cable machines is the amazing power provided by mains operation, three times that of battery machines, and, due to the lack of costly batteries and 24V components, the machines are truly cost effective, almost two for the price of one. Cable machines are used extensively in many industrial applications where floors are quite often rough and exceptionally dirty.

The Chassis

Semi-Parabolic floor tool

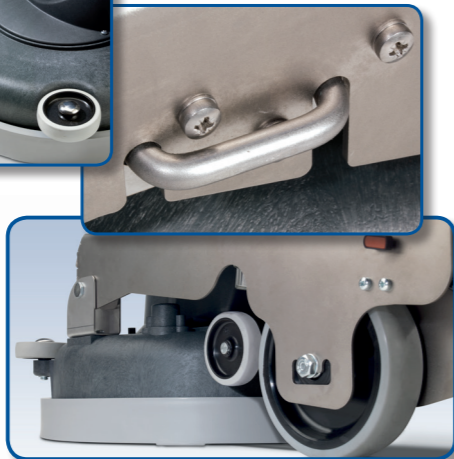

The TT 4045 is based on a full stainless steel chassis and packed with truly meaningful, innovative features that have been developed by years of experience. The combination of stainless steel, Structofoam and polyform tanks ensures durability.

Structofoam brush deck

DeckLoc tilt mechanism

Deck tilt system

Full stainless steel chassis

The inside story... long life, hardworking design

The cable TwinTec design concept is where it all started many years ago and it has been so reliable, successful and well received that many of the original machines are still going strong after 20 years.

The Tanks

The superstructure comprises 40 litre clean and dirty water heavy duty polyform tanks designed to provide a truly robust structure and equipped with a series of advanced, yet practical, features.

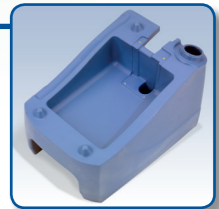

Large capacity trash basket

Flexifill 1m easy fill hose

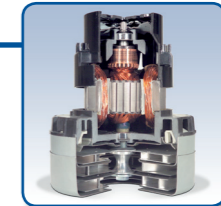

Polyform 40L dirty water tank

Polyform 40L clean water tank

The Power System

No expense has been spared when selecting the motor modules with the industrial TwinFlo vacuum motor providing the exceptional wet pick up performance whilst the heavy duty brush motor with its oil filled, low load, planetary gearbox provides maximum power transmission direct to the floor.

TwinFlo suction motor

Heavy duty power drive

Total control

Simplicity is sometimes the best policy and this applies to the TT control system and the fully adjustable operator handle, ensuring maximum convenience of both use and control. Simple On/Off trigger control, independent switching and exceptional manoeuvrability ensures ease of use for all operators.

Trigger control

Simple operational control
