

BOWLENE

TOILET BOWL CLEANER

CONTAINS: Phosphoric acid 140g/L

BENEFITS:

- Unique 3-in-1 action
- Removes rust, scale, toilet stains and algae growth
- Eliminates odour causing bacteria
- Septic safe

BOWLENE is a concentrated, phosphoric acid, toilet bowl cleaner designed to rapidly penetrate and remove the most difficult hard water stains. The 3-in-1 action of BOWLENE rapidly cleans, sanitises and deodorises toilet bowls both effectively and efficiently. BOWLENE quickly and efficiently removes rust stains, scale and most other toilet bowl stains.

It quickly neutralises mal-odours and helps control fungi. It is ideally suited for all toilets and urinals including systems operating on septic tanks. BOWLENE is available in 5 litre and 1 litre packsizes. The 1 litre bottle has a special applicator for squirting the BOWLENE solution under the rim of the bowl or urinal.

Persistent mal-odours in bathrooms and washrooms come from difficult to remove soils and bacteria penetrated into old, porous ceramic tiles and urinal pipes. BOWLENE offers a deeply penetrating cleaning action to remove soils and neutralise mal-odours in these areas. Remove the cap, and apply BOWLENE to the outer edges of the pipe and scrub with a brush.

DIRECTIONS FOR USE:

For best application use BOWLENE in 1L squeeze bottles; invert the special applicator and apply under the rim of the bowl or urinal allowing the product to run into the bowl or urinal. Leave for a minimum of 10 minutes before flushing the toilet. For heavily stained or encrusted toilets leave for 10 minutes and scrub using a brush.

TOILET BOWLS: Press cap of container, insert bottle and squeeze to direct BOWLENE into the bowl beneath the rim. Brush all areas of the toilet bowl with this solution, making sure that the area beneath the rim is thoroughly cleaned. Clean seat with same solution and wipe dry with a soft cloth or toilet tissue.

URINALS: Squeeze bottle to cover urinal area and clean with toilet brush, immediately after cleaning flush generously with water.

Bowlene - July 2014, 1

CAUTION:

Being acidic in nature BOWLENE should not be used on surfaces that may be reactive to acids such as aluminium, terrazzo, concrete, marble etc.

WARNING:

Do not store near chlorine or bleach. Never mix with chlorine or bleach.

RISK:

Irritating to the eyes and skin.

SAFETY DATA:

In case of accident or if you feel unwell, seek medical advice immediately (show label whenever possible). For further information refer to the Material Safety Data Sheet (MSDS) located on the Whiteley Industrial website: www.whiteley.com.au

HEALTH AND SAFETY STATEMENT:

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.

ENVIRONMENTAL STATEMENT:

Whiteley Industrial manufactures products that comply with Australian and International environmental policies. Whiteley Industrial aims to ensure that every product is 100% biodegradable, whilst achieving optimal performance and benefit to customers. All Whiteley Industrial products are supplied in 100% recyclable containers.

Whiteley Industrial and its staff are fully committed to ensuring that our Australian environment and those international environs in which our products are used are enhanced by the use of technology, and that these
