

Tile & Grout Restore

Advanced tile & grout restoration compound

T&G Restore is a proprietary restoration cleaner for neglected, black grout lines and tiles. T&G Restore's low pH formula contains no hydrochloric, hydrofluoric, phosphoric or sulphamic acids, but is more powerful and effective, yet safer and pleasant to use. T&G Restore makes quick

work of mineral scale, cement/grout smear, efflorescence, soap scum and embedded stains. It provides tough action on general grime and is excellent for grout restoration ahead of applying a sealant.

T&G Restore is an advanced low pH technology grout and stone restoration compound which gives outstanding results while still being low in toxicity and OHS ratings.

BENEFITS

- Restoration Power – T&G Restore has the muscle to tackle years of efflorescence, mineral scale and alkaline detergent build-up. Speciality penetrating agents ensure quick and effective action saving you time and effort.
- Grout Specialist – overcomes stubborn grout stains, embedded soils and cement/grout smear. Always use T&G Restore to prepare grout ahead of applying grout sealer.
- A Total Solution – unparalleled cleaning punch, yet safe to use and non-corrosive on non-ferrous metals (eg Aluminium) when used as recommended.

Recommended applications:

T&G Restore is safe on all man-made tiles. Use with care on sandstone, quarry tiles, terracotta and slate. T&G Restore can be used on granites and bluestones that have a flamed or sawn finish but should not be used on acid sensitive surfaces and polished surfaces including marble, limestone, polished granite and other natural stone. Although unlikely to mark non-ferrous metals (e.g. Aluminium), always pre-test before use.

Ideal for cleaning very dirty tiles. Especially good in restoration applications and washrooms, showers, pool surrounds, grout smear removal and builders cleans.

PRODUCT SPECIFICATIONS

Product code: AP160

pH: 1.0

Dilution: See direction

Fragrance: N/A

Safety: Irritant

Colour: Clear, light tan liquid

Substrate Suitability: See directions

Packaging: 5Lt, 15Lt, 200Lt & 1000Lt

Tile & Grout Restore

Advanced tile & grout restoration compound

HOW TO USE

Read and understand the SDS before use.

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals.

Directions:

Usage: Mineral scale build-up, efflorescence, cement residues and heavy duty applications.

1. Mix 1 part T&G Restore with 10 to 30 parts water (100-30ml/Litre). Apply with a clean mop and bucket, rotary scrubber or auto-scrubber. Apply only to a limited area at a time. Do not allow solution to dry.
2. Scrub thoroughly with applicable nylon scouring/floor pad or brush.
3. Allow 10 to 30 minutes dwell time and re-agitate.
4. Extract/Pick up resultant slurry with extraction equipment.
5. Neutralize remaining residues by rinsing thoroughly with a 1:300 solution (30ml/10Lt) of T&G Cleaner Pro or Proneutro

Usage: Grout residues & light duty applications.

1. Mix 1 part T&G Restore with 80 to 100 parts water (10-12ml/Litre) Apply with a clean mop and bucket, rotary scrubber or auto-scrubber. Apply only to a limited area at a time. Do not allow solution to dry. Apply solution with a mop and bucket, auto scrubber or pressure washer.
2. Scrub thoroughly with applicable nylon scouring/floor pad or brush
3. Allow 10 to 30 minutes reaction time and re-agitate.
4. Rinse well with clean water.
