

Colloidal Boost

Cleaning solution booster additive

Colloidal Boost is a concentrated blend of the best of modern cleaning and stain removal technology. This formula combines super wetting agents and penetrants with radical strength emulsification chemistry which

is further enhanced by stain removal technology used in the textile industry. The beauty of Colloidal Boost is that it doesn't rely on harsh solvents or alkaline cleaning agents, but uses smart chemical technology to achieve it's brilliant results, making it an ideal product for use in professional carpet and upholstery cleaning.

BENEFITS

- **Super Wetting Feature** – Colloidal Boost dramatically increases the wetting power of any detergent solution. Compared with a traditional prespray detergent, Colloidal Boost will increase the wetting power several thousand times more effectively enabling the emulsifiers and stain removal agents to penetrate dramatically quicker and deeper into each carpet fibre and completely wet out the difficult-to-wet oily soils.
- **Dynamic Emulsification** – Having effectively wetted out the surface and soil the innovative "Dynamic Emulsification" chemistry rapidly forms miscelles (emulsified oil globules) which releases the oily soils from the surface or fibre and holds them in suspension ready for effective rinsing.

- **Penetration Ability** – The super wetting ability of Colloidal Boost also facilitates the penetration into porous surfaces such as natural stone, concrete and grout.
- **Chemical Compatibility** – Colloidal Boost can be added to most carpet and hard floor care detergents. It will not alter the ionic charge or pH of the detergent solution.
- **Fibre Safe** – Colloidal Boost has a neutral pH and is safe for use on all synthetic and most delicate fibres and fabrics including 5th generation nylon and coloured fabrics.
- **User Friendly** – low odour formula – pleasant to use.

DIRECTIONS for USE

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals.

Application:

Mix 10 – 20ml Colloidal Boost per litre of ready-to-use cleaning solution. Follow normal procedure.

Tip: Colloidal Boost can also be used on it's own as a spotter (dilute 1:9) or as a prespray (dilute 1:50 to 1:100)

PRODUCT SPECIFICATIONS

Product code: AP475

pH: 7.5
