

# Tile & Grout Cream

**Colloidal abrasive cream (nano-technology)**

T&G Cream is a unique and professionally formulated blend of new nano-colloidal chemistry which works synergistically with the water and solvent based cleaning ingredients. This blend is then boosted with a specialty micro-abrasive. The net result

is a powerful all-rounder which delivers startling cleaning performance across a wide range of applications.

## BENEFITS

- Safety First – Whilst T&G Cream has been formulated to deliver “startling cleaning performance”, the ingredients have also been carefully selected for their low hazard and non-toxic safety profiles.
- Speciality Penetration Feature – The chemistry featured in T&G Cream has the unique ability to penetrate through the soil or wax film and separate it from the substrate, enabling it to be flushed away.
- Protective Wax Coatings – T&G Cream is unique in its ability to dissolve and remove porcelain factory-applied wax coatings.
- Grout Haze – With the help of its micro abrasive content, T&G Cream effortlessly removes grout haze.
- Fine Stone Compatible – Safe for use on all marble, fine stone, porcelain and tile.
- Wide Range – Provides outstanding removal of deep set grime and grease, factory applied wax on porcelain, grout haze, removes paint spots, graffiti, bitumen, tar, chewing gum, most cosmetics and many stains caused by foods.

## Directions for use:

### Floor Surfaces:

1. No dilution required
2. Apply T&G Cream directly to the affected area.
3. Scrub thoroughly using a slow speed scrubber fitted with an applicable nylon pad or brush.
4. Allow 10 to 20 minutes dwell time for penetration, dissolving and lifting of oily soils or wax films.
5. Scrub and rinse well with clean water or detergent solution.

### Vertical Surfaces:

- No dilution required
  - This thickened nature of T&G Cream means it can be used for removing wax films, grout haze, oil, grease, paint, and graffiti off vertical surfaces.
1. Apply directly to the surface or onto a nylon (non-scratch) scouring pad.
  2. Spread over the surface and agitate.
  3. Allow 5 to 10 minutes dwell time.
  4. Scrub / agitate and rinse well with clean water.

## PRODUCT SPECIFICATIONS

**Product Code:** AP152

**pH:** 1 - 1.5 RTU

**Colour:** White cream

**Substrate Suitability:** Consult directions

**Packaging:** 500ml & 5Lt
